1. Please refer to ABL General Warnings Form No. 503.204 and Form No. 503.203.

2. Be sure the power is off at the mounting accessory location.

3. Install the mounting accessory in the desired location using appropriate fasteners (by others). Mounting accessory sold separately.

4. Attach the Yoke Mount fixture to the accessory using the supplied cord seal fastener (included with mounting accessory).

5. Route fixture cord through cord seal fastener and tighten seal nut. Make all wiring connections to the fixture within the mounting accessory splice compartment.

   **NOTE**: Make sure that there is enough cord left free for aiming of the fixture.

6. Remove the two outer cover caps from the fixture yoke mount. Loosen the locking nuts and aim the fixture as required. Retighten the locking nuts securely and replace cover caps.

7. Open the fixture lens door by loosening the two cover screws. Install the proper lamp (see inside fixture label). Close the lens door and re-tighten the two cover screws securely. (Lamp sold separately).

8. Supply proper AC power to the fixture.

**MOUNTING ACCESSORY**

- **A 8100 Yoke Mount Fixture**
  1. Fixture Cord
  2. Yoke Mount
  3. Yoke Cover Caps
  4. Locking Nuts and Washers (2)
