CONSTRUCTION

The classically shaped round luminaire has a decorative cast aluminum base/ballast housing, arms, finial and hinged roof. The dome and decorative vent assembly are spun aluminum. The gasketed globe is clear, smooth acrylic. All hardware is stainless steel.

INSTALLATION

The luminaire mounts on a 3” O.D. x 3” tall tenon with six, ¼-20 socket set screws. The roof is gasketed and hinged for easy access to the lamp. Ballast assembly is easily accessed through the top of the base/ballast housing. Quick disconnect plugs are furnished for access to the ballast assembly and the reflector.

OPTICS

The luminaire utilizes an internal, anodized and segmented reflector with socket for horizontal lamp. Reflectors are available in four different distributions and are interchangeable. Luminaire is furnished with an H.I.D. ballast assembly. The luminaire is UL and CUL listed and labeled as suitable for wet locations. Sockets are glazed porcelain, medium base, with a copper alloy nickel-plated screw shell and center contact. Ballasts are core and coil, high power factor, regulating type.

FINISH

The luminaire has a powder coat finish utilizing a premium TGIC polyester powder. The finish is a three-stage process which consists of drying, powder application and curing. Before coating, the parts are treated with a five-stage pretreatment process, consisting of a heated alkaline cleaner, rinse, phosphate coating, rinse and sealant.
