LUMINOUS CROSS BAFFLES WITH AN EDGE

gotham®

For over 60 years Gotham has advanced the cause of recessed downlighting and a “quiet ceiling.” That’s something we take seriously. But there are times and places to make a distinct statement. Differentiate a space with light, color and sparkle. Add unique character, give your design an edge. You want to play with light. So do we. That’s what ICE™ is about. **Have fun.**

ICE is innovative, patented design. Only Gotham can offer this eye-catching look in a recessed downlight — and in our Elevations™ family of pendant downlights as well. Consider all the possibilities:

		RECESSED 6" HORIZONTAL LAMP	RECESSED 8" HORIZONTAL LAMP(S)	ELEVATIONS 8" HORIZONTAL LAMP
CLEAR ICE

ICE™ Clear is designed to be noticed. Use it selectively to accentuate an area of interest, or throughout a space to create a singular visual signature.

DOWNLIGHTING WITH ATTITUDE

There's nothing complex about ICE. Just an imaginative use of clear acrylic panels inside a soft-anodized aluminum reflector. We've taken a simple idea and made it work — beautifully.

ICE Clear baffles are designed so that their edges appear more luminous than the surrounding aperture. Eyes are attracted to the edges while the vertical surfaces are virtually transparent — creating the illusion of a luminous element floating inside the aperture.

ICE is innovative. Designed to be noticed. Completely unique.

A PREMIUM QUALITY LIGHTING INSTRUMENT

ICE catches the eye with its luminous baffle edges, but don't let the decorative appearance fool you. Whether in a Gotham recessed luminaire or an Elevations™ pendant, this is a highly engineered downlight featuring advanced optics for superior performance. The reflector design is based on our patented Bounding Ray™ optical principle, optimized for compact fluorescent lamps to ensure effective, efficient delivery of light into the space. 35° optical shielding is maintained, exhibiting smooth top-down flash as the lamp is revealed.

ICE BLADES. ICE TURBO: CHOOSE THE LOOK YOU LIKE

With ICE Clear, you can select from four available baffle styles, all variations on this visually distinctive theme. **ICE Blades** offer three styles of intersecting cross-baffles — flush, round and angular configurations. The fourth, **ICE Turbo**, features three radial baffles supporting a central cylindrical element. ICE blades and ICE turbo baffles add varying degrees of accent to a space. Decorative and optical elements are fully integrated so that the visual effect, though distinctive, does not overwhelm the ceiling plane.

ADD A SLICE OF COLOR

Want even more visual punch? Think Sky Blue, Snow White, Ruby Red, Amber. ICE Color lets you draw attention to key areas or featured items in a space, and gives you another tool to augment your interior design palette. Each acrylic baffle is jacketed by diffuse aluminum surfaces, intensifying the color effect at the aperture while shielding visibility to the lamp. Like ICE Clear, the reflector's soft-anodized finish creates a comfortable, luminous aperture that contrasts well with the radiant baffle edges. You can specify ICE Color on ICE blade flush (for a subtle touch) or ICE blade round (for a bit more emphasis).

CREATE AN EFFECTIVE LIGHTING MIX

Six- and eight-inch aperture ICE luminaires complement Gotham recessed downlights, wallwash and directional accent products in a space, so you can satisfy a range of lighting needs while maintaining continuity of appearance. You can extend that continuity to open ceiling areas by specifying Elevations pendants, with and without ICE apertures. ICE is available in a range of compact fluorescent sources – from 18 to 57 watt triple tube lamps.

EASY INSTALLATION AND MAINTENANCE

Recessed ICE fits into a standard Gotham compact fluorescent housing with all of its thoughtful mechanical features. Horizontally lamped luminaires can be installed practically anywhere, even in shallow plenum applications. Relamping and service are easily accomplished with tool-less access to lamps. Trims return neatly to their original position without harm to surrounding surfaces.

Ask your lighting representative for detailed information on ICE Clear and ICE Color decorative downlighting, a Gotham exclusive. Or visit our website at www.gothamlighting.com.

The image shows a contemporary eyeglass store. The interior is characterized by clean, white, vertical-lined cabinetry and display cases. Several circular mirrors on stands are positioned around the room. The ceiling features recessed lighting with a distinctive blue and white geometric pattern. A large window on the right side is composed of many small, square glass panes. In the foreground, a white counter and a light-colored chair are visible. The overall aesthetic is bright, airy, and modern.

ICE™ Color adds even more visual punch, in ICE blade flush or round baffle configurations. Wherever and however you choose, ICE combines unique character and vibrancy with advanced optics for superior performance.

ORDERING INFORMATION

ICE BLADE

SERIES	LAMP/WATTAGE	REFLECTOR/COLOR	BAFFLE TYPE	VOLTAGE	BALLAST	OPTIONS
PDXF	1/18TRT	6AR Clear	CLRR Clear Round	MVOLT ²	(blank) GEB10 standard.	TRW White painted flange
	1/26TRT	8AR Clear	CLRF Clear Flush	120	Electronic ballast.	WLP With 35°K lamp (shipped separately).
	1/32TRT		CLRA Clear Angular	277	DMHL ³ Lutron Compact	LRC Provides compatibility with Lithonia Reloc [®] System.
	1/42TRT		RLRF Red Flush	347	SE [®] Electronic dimming ballast	Lithonia Reloc System can be installed less this option with connectors provided by others. Access above ceiling required.
	1/57TRT ¹		RLRR Red Round		ADEZ ³ Advance Mark X™	Electronic dimming ballast.
	2/18TRT ¹		BLRF Blue Flush			
	2/26TRT ¹		BLRR Blue Round			
	2/32TRT ¹		ALRF Amber Flush			
	2/42TRT ¹		ALRR Amber Round			
			WLRF White Flush			
			WLRR White Round			
						GLR ³ Single, fast-blow fuse (not available with MVOLT).
						RIF Radio Interference Filter.
						ELR ⁴ Emergency battery pack. Remote test switch provided.
						QDS Quick Disconnect for easy ballast replacement. Not available with ELR option.
						DS Dual switching.
						GSKT Gasketing, ships uninstalled.
						CP ⁴ Chicago Plenum.
						CAL Clear acrylic lens. For use where enclosed fixture is required.
						CSA Listed and labeled to comply with Canadian Standards.
