

Decorative luminaires for open ceiling commercial and retail applications

Indy[™] Commercial/Retail Lighting

Commercial and Retail Lighting

Retail and commercial applications require a special kind of lighting fixture. Robust construction, choice of lamp, and energy efficiency are some of the important and quantifiable attributes that good luminaires must possess. However, it is the more abstract features like differentiating a store from its competitor, creating a special look or theme, or simply having the ability to match the color of the decor that make a good luminaire great for retail and commercial applications. This is all possible with Indy™ indoor commercial and retail lighting. With literally hundreds of thousands of possible configurations, Indy luminaires can be customized to deliver that special look that sets a project apart.

Indy luminaires are customizable on many levels:

- Multitude of lumen packages
- Customizable accessories: decorative bands, rods, lenses and louvers
- Choice of reflector size 10", 12", 16" and 22"
- Glass, acrylic, or aluminum reflectors
- Bottom lenses in many configurations
- Three standard finishes, plus unlimited custom colors

One Family, Many Options

Indy™ luminaires are designed to make a bold statement in commercial and retail environments. One distinct family of products with many options and choices engineered to allow the discerning designer to customize the fixture to the project requirements.

Exeter

Luminaires with an extended range of decorative accessories to change the fixture appearance and to adjust to many settings. Rods, bands, rings, lenses and louvers can be combined and customized with special colors to create a new fixture look every time. The Exeter E3 LED delivers outstanding energy efficiency and lamp life.

E3 Series with 22" Aluminum Reflector and Custom Color (RAL 1027)*

E3 Series with Deco-Rods and Ring, 16" Glass Reflector, and Custom Color (RAL 6029)*

E3 Series with Deco-Discs and Bands, 12" Acrylic Reflector, and Custom Color (RAL 5002)*

^{*} NOTE: Actual fixture color may vary from what is shown in our printed and electronic formats. Prior to making a color selection, it is highly recommended that color swatches/paint chips be obtained from a factory sales representative or reputable paint retailer.

Exeter - E3 LED

LED up to 10,000 Lumens

Features

Application: Ideal for retail and clean commercial environments with ambient temperatures of up to 40°C (104°F).

LED Light Engine: The E3 LED features a robust LED light engine that delivers up to 10,000 lumens. Available in 3000K, 3500K and 4000K color temperatures, with 80+ CRI. E3 LED fixtures are designed to produce crisp white light that is comparable to traditional Metal Halide.

Style: A wide selection of decorative elements are available with E3 LED luminaires. Decorative bands, rods, rings, and lenses can be added and combined to create unique looking fixtures. Special finishes and colors can be ordered to fully customize the luminaire.

Optical: Acrylic and aluminum reflectors produce different lighting effects. The acrylic version provides a small amount of up light to give ceilings an inviting glow. The aluminum reflector can be finished to match the housing or painted in a different color to produce a two-tone fixture finish and produce no up light. All fixtures use a glass optic that is specially designed for high open ceiling applications.

Mounting: The Exeter E3 LED has an integral driver for quick and easy installation. The luminaire includes a 3/4" hub that can be used for a hook or a pendant style mounting arrangement. Additionally, the fixtures can be ordered with a provision for cable suspension. The cable suspension system must be ordered separately.

Certification: UL1598 / CSA C22.2 No. 250.0-08. Suitable for damp locations. Assembled in the U.S.A. Union made.

Exeter E3 LED luminaires are available with nLight® AIR wireless lighting controls. For more information on nLight AIR, please visit acuitybrands.com/nlightair.

Custom Colors In addition to the standard silver, white and black finishes, Exeter E3 LED luminaires can be specified in virtually any custom color. For custom color suggestions and additional information, please visit Index.out.nd information information information.

Optical Assemblies

Reach the highest level of performance by choosing either a high performance glass, acrylic or aluminum reflector.

Mounting

Select rigid stem, hang straight kit or cable suspension kit. See accessories on page 13.

Trims and Accessories

Exeter luminaires have a broad range of decorative trims and accessories.

The trim style with bands on the luminaire (shown) can be substituted with rods, or be provided without trims

Internal LED Components

Passive Cooling

Exeter E3 LED luminaires include a passive cooling system to keep the LED arrays running at very low temperatures, extending LED life. Expected system life is 60,000 hours.

Glass Optics

Every LED Exeter is manufactured with a glass optic that shapes the beam of light to a standard initial form. The secondary reflector (acrylic or aluminum) gives the light its final optical definition.

* NOTE: Actual fixture color may vary from what is shown in our printed and electronic formats. Prior to making a color selection, it is highly recommended that color swatches/paint chips be obtained from a factory sales representative or reputable paint retailer.
