PRODUCT DESCRIPTION

Low profile, two-circuit track sections for surface or pendant mounting. Provides two separate 20-amp circuits from a single electrical feed or one 20-amp circuit controlled by two switches. I-beam cross section provides added strength and rigidity in pendant suspended applications. Compatible with a full range of feed, connector and mounting accessories, as listed on back of this page, to complete virtually any installation requirement. Accepts all Trac-Master and Trac-Lites track fixtures, which have a moveable "hot" contact to allow operation using circuit (or switch leg) 1 or 2.

PRODUCT SPECIFICATIONS

Construction Extruded aluminum "I" beam channel • One-piece thermoplastic insulator • Injection molded polycarbonate dead-end with set screw • Standard lengths may be cut-to-length by installer.

Electrical Three 12 gauge solid copper conductors • Each circuit rated 20 amps at 120 volts (40 amps total) • Aluminum channel used as system ground • One-piece insulator insures consistent conductor spacing for reliable electrical contact • Insulating bushings supplied at mounting hole locations to prevent shorts to ground.

Labels UL listed, CSA certified.

Government Procurement

BAA – Buy America(n) Act: Product qualifies as a domestic end product under the Buy American Act as implemented in the FAR and DFARS. Product also qualifies as manufactured in the United States under DOT Buy America regulations.

BABA – Build America Buy America: Product qualifies as produced in the United States under the definitions of the Build America, Buy America Act.

PRODUCT INSTALLATION

Debossed polarity line provides visual cue to proper track, track connector and fixture alignment • Supplied with toggle bolts for surface mounting • Integral raceway in top of channel accommodates pendant mounting hardware and wire routing to electrical feed • Insulator stays same length as extrusion to simplify field-cutting of track • Connectors and feeds simply push into track sections.

WARRANTY 1-year limited warranty. This is the only warranty provided and no other statements in this specification sheet create any warranty of any kind. All other express and implied warranties are disclaimed. Complete warranty terms located at: www.acuitybrands.com/support/warranty/terms-and-conditions.

Note: Actual performance may differ as a result of end-user environment and application.

Specifications subject to change without notice.

DIMENSIONS

INSTALLATION GUIDE

Use two switches for greater control, two circuits for greater capacity.

Where wattage requirements are 2400W or more, the track run may be fed from one point, providing 4800W capacity plus 2 switches.

One Circuit with Two Switches - 2400W Max.

Two switches may be used on each track run with a portion of track fixtures run by Switch 1 and the balance on Switch 2

• Dimmers, occupancy sensors, timers, etc. can also be utilized to provide other lighting effects along the run.

Two Circuits with Two Switches - 4800W Max.

Two-Circuit Trac-Master provides a load capacity of 4800W (two 2400 watt circuits) using split phase common neutral circuit

• This "double capacity" eliminates 50% of the feed points in long runs reducing wiring costs and simplifying the installation
• Two separate circuit switches permit flexibility in combining lighting effects along the run.
