Lighting Control System

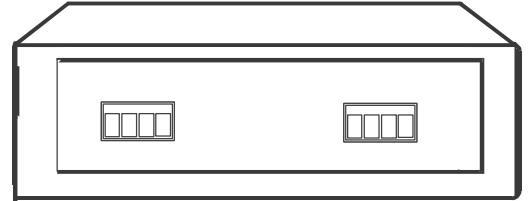

## FEATURES

The SYA Cable - A4 system network repeater provides a means of extending the Synergy digital control station network beyond 2000 feet, linking network segments that are wired with two different wire types (SYA-Cable A-4 or 3015A only) or accomodating T-Taps or braches on the network.

- Connects to SYA Cable A-4 pair networks via detachable terminal blocks
- Low voltage power supply included
- LEDs indicate network status
- 3,000V isolation between networks
- Termination and biasing jumper-selected for each network

# LSA M1 RS4852

Network Isolator and Repeater

## ORDERING INFORMATION

Choose the boldface catalog nomenclature that best suits your needs and write it on the appropriate line. Order accessories as separate catalog number.

**LSA M1 RS4852**
