Lighting Control System

LVKS

FEATURES

Synergy Lighting Controls LVKS key switches provide a durable and attractive solution for providing a secure means to override lighting. The user must have the LVKS key (which is provided) to override lights. Switches are supplied with 6" wire pigtails for low voltage connections.

Use with Synergy® or SwitchPak® lighting control panels. The LVKS can be used with the LVPS switch in a multi-gang decorator style wallplate.

Low Voltage Key Switch

OPERATION

- Fits in single-gang wall box, 2" deep
- Use standard decorator wall plate (not included)
- Fits side-by-side for multi-gang mounting
- Class 2, low voltage

ORDERING INFORMATION

Choose the boldface catalog nomenclature that best suits your needs and write it on the appropriate line. Order accessories as separate catalog number.

Example: **LVKS SPDT WH**
