FEATURES

INTENDED USE

The SYWR is an infrared wireless transmitter that provides for remote control of lighting functions in a Synergy system. The SYWR operates in conjunction with the infrared receiver that is ordered as an option on the SYRS digital remote station.

ATTRIBUTES

Six buttons on the SYWR transmitter can be configured to provide a variety of lighting control functions including on/off, preset recall and master raise/lower operation.

CONSTRUCTION

The contoured thermoplastic housing is ergonomically designed for comfortable hand-held operation. Large soft-touch buttons provide simple operation.

FINISH

Gray housing with contrasting buttons.

ELECTRICAL

Power is provided by two type 23A batteries which are provided with the unit.

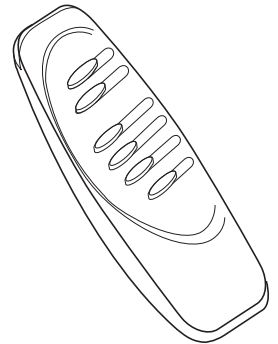

WARRANTY

One-year total customer satisfaction warranty.
