Note: See following page for details.

Construction

The arms are extruded aluminum, one-piece construction with a cast aluminum finial. All exposed welds are dressed. All welding is per AWS D1.2/ D1.2M:2003 and all welders are certified. All exposed hardware is tamper resistant stainless steel except for wall mounted hardware which is black zinc plated.

FINISH: The arm has a powder coat finish utilizing a premium TGIC polyester powder. The finish is a three-stage process which consists of drying, powder application and curing. Before coating, the parts are treated with a five-stage pretreatment process, consisting of a heated alkaline cleaner, rinse, phosphate coating, rinse and sealant.

Installation

The pole arm mounting plate attaches to the post with four, 3/8-16 hex-head bolts. Center of arm is located at 12" below Pole top. The wall mount arm mounting plate has four, .56" diameter holes for mounting to the wall. It is furnished with two 3/8-16 acorn nuts and washers. Wall studs and junction box are furnished by others. 2" x 4" vertical junction box is recommended. Mounting hardware for wall mount is furnished by others. Arms have a removable finial for wiring access and are furnished with two set screws for luminaire mounting.

WARNING: Tersen reserves the right to modify specification without notice. Any dimensions on this spec sheet is to be assumed as a reference dimension used for informational purposes only.
